Normativa sulla sicurezza e sull'introduzione di beni alimentari nel mercato cinese: produzione, esportazione e documenti doganali

Gravissimi episodi di frodi alimentari hanno portato il governo cinese alla necessaria stesura di norme particolarmente stringenti, per recuperare la fiducia dei consumatori. Altrettanto stringente è la verifica della applicazione delle norme: produttori e esportatori devono quindi curare massimamente gli aspetti procedurali e documentali delle loro esportazioni verso la Cina.

Food and Safety Law, pubblicata nel giugno 2009 (e successivi aggiornamenti) è la legge che in Cina stabilisce gli standard tecnico-qualitativi in campo alimentare, così come le procedure per l'ingresso di beni alimentari entro i confini nazionali. La conformità dei prodotti a tali standard viene testata alla frontiera di entrata in Cina.

Registrazione del produttore. Per poter introdurre sul mercato cinese la propria produzione, **gli impianti di produzione di carni, caseari, frutta, devono essere approvati dalla amministrazione cinese AQSIQ e quindi registrati in una lista ufficiale:** l'azienda deve ottemperare all'obbligo di registrazione del singolo stabilimento produttivo tramite le autorità locali italiane. Per iniziare il processo di registrazione, il produttore deve contattare l'**Azienda Sanitaria Locale/Azienda Tutela Salute** di competenza territoriale per lo stabilimento di produzione, la quale rilascia un documento che certifica che l'impianto risponde agli standard cinesi necessari per l'ingresso nel mercato cinese (il **Ministero della Salute italiano** ha diramato a tutto il territorio il modello di tale documento, con una circolare del dicembre 2014). Il **Ministero della Salute italiano**, ricevuta la documentazione dalle **ASL/ATS**, la integra con una dichiarazione di conformità e inoltra la richiesta di registrazione degli stabilimenti italiani alle **autorità cinesi** per il tramite **dell'Ambasciata d'Italia a Pechino**.

Le autorità cinesi, quando ritengano conforme la documentazione, concedono la loro approvazione e inseriscono l'azienda richiedente nella lista degli stabilimenti autorizzati, pubblicata su un portale web dell'amministrazione competente, purtroppo disponibile solo in cinese: (<http://www.cnca.gov.cn/ywzl/gjgnhz/jkzl/>)

L'ufficio presso il Ministero della Salute competente per la registrazione sopra indicata è la Direzione Generale per l'Igiene e la Sicurezza degli Alimenti, Ufficio IX, sito in Via G. Ribotta n° 5 00144 Roma Tel 06 59946117 indirizzo e mail: export.alimenti@sanita.it.

Registrazione dell'esportatore. Dal 1° ottobre 2012, **tutti gli esportatori** verso la Cina di prodotti agroalimentari, vino incluso, hanno **l'obbligo di registrarsi** sul sito dell'Amministrazione cinese per la Supervisione della Qualità, l'Ispezione e la Quarantena - **AQSIQ** <http://ire.eciq.cn/> (sito disponibile anche in lingua inglese) La registrazione prevede la compilazione, da parte dell'azienda esportatrice, di un formulario on-line con le informazioni relative alla ditta e ai suoi importatori/agenti autorizzati in Cina.

Documenti per l'esportazione: effettuata la prima registrazione, ogni esportazione deve essere corredata della seguente documentazione

1. contratto di vendita o conferma d'ordine;
2. fattura;
3. packing list;
4. cargo manifest;
5. polizza di carico (bill of lading);
6. avviso di spedizione (dallo spedizioniere all'importatore);
7. certificato di origine;
8. certificato sanitario per l'esportazione;
9. campione dell'etichetta conforme alla normativa cinese;
10. copie di campione dell'etichetta tradotte in cinese;
11. certificato fitosanitario (richiesto anche per imballaggio in legno; benché tale certificato non sia obbligatorio, le dogane cinesi lo possono richiedere. Vi consigliamo pertanto di attivarvi con lo spedizioniere e di richiedere agli uffici regionali del Ministero delle Politiche Agricole, Alimentari e

Ufficio ICE di Pechino

Forestali, il Certificato Fitosanitario prima di far giungere a destinazione i prodotti agroalimentari. L'elenco sopra riportato costituisce l'insieme dei documenti normalmente richiesti dalle autorità locali per l'ingresso dei prodotti agroalimentari in Cina. Si raccomanda comunque di verificare con l'importatore (intermediario imprescindibile in Cina, vedi più avanti) i documenti necessari per ogni tipo di prodotto ed i valori massimi consentiti.

Caso particolare: prosciutto crudo o cotto e in genere carni suine stagionate e trattate termicamente:

per importare tali carni, dal 1° febbraio 2013, oltre ai documenti precedentemente elencati, è necessario allegare anche un ulteriore documento con le seguenti informazioni (fac-simile qui a fianco)

- numero progressivo
- numero del certificato
- descrizione/nome del prodotto
- peso netto
- numero dei colli / pezzi
- numero di identificazione/approvazione del macello approvato
- numero di identificazione/approvazione dell'impianto di disossamento approvato
- numero di identificazione/approvazione dell'impianto di lavorazione approvato
- numero di identificazione/approvazione dell'impianto di affettamento approvato
- numero di identificazione del container
- numero di identificazione del sigillo sul container
- porto di entrata in Cina
- nome dell'esportatore
- nome del destinatario / importatore
- nome del veterinario autorizzato che firma
- data di rilascio del certificato

Il documento deve essere rilasciato dalle competenti ASL/ATS locali.

No.	No. progressivo	Veterinary certificate number	Denominazione del prodotto	Net Weight	Peso netto	Approved No. of slaughteringhouse	Numero delle confezioni o colli	Approved No. of deboning establishment	Numero di riconoscimento dell'impianto di macellazione approvato	Approved No. of processing establishment	Numero di riconoscimento dell'impianto per il disossamento approvato	Approved No. of slicing establishment	Numero di riconoscimento dello stabilimento di trasformazione	Container number	Numero di riconoscimento dello stabilimento di affettazione	Container Seal number	Numero del container	Port of Entry in China	Porto di entrata in Cina	Exporter Name / Consignor Name	Nome dell'Esportatore o dello Speditore	Consignee Name	Nome del Destinatario	Name of the signing official veterinarian	Nome del veterinario ufficiale firmatario	Date of issuance of the certificate (yyyy-mm-dd)	Data di rilascio del certificato (aaaa-mm-gg)

Etichettatura

Su tutti i prodotti agroalimentari confezionati importati in Cina grava l'obbligo dell'etichettatura in lingua cinese, secondo quanto previsto dalle norme del China National Standard, GB7718-2011: il testo ufficiale di tale norma è disponibile solo in lingua cinese (in *appendice* di questa nota ne trovate la traduzione non ufficiale).

L'etichetta in cinese può essere applicata all'origine o a destinazione:

- *applicazione dell'etichetta cinese all'origine:* l'esportatore fornisce le informazioni di base all'importatore che provvederà a realizzare un modello di etichetta conforme alle norme cinesi, ottenendo anche un pre-assenso informale da parte delle autorità locali. Tale modello sarà poi utilizzato dall'esportatore per stampare o applicare le etichette direttamente sull'imballaggio originale. Il prodotto arriva quindi alla dogana cinese già etichettato e pronto per le pratiche di sdoganamento che verranno curate dall'importatore. Il vantaggio di utilizzare questa procedura resta nella possibilità di adattare più pienamente la veste grafica del prodotto al mercato cinese e nella non necessità di intervenire con manipolazioni del prodotto in magazzino doganale
- *applicazione dell'etichetta cinese a destinazione:* l'esportatore invia in Cina la merce e fornisce i dettagli di etichetta obbligatori all'importatore in Cina. Quest'ultimo provvede a tradurre, stampare ed applicare le etichette direttamente all'arrivo della merce in Cina all'interno di un magazzino franco. Questa soluzione permette una maggiore flessibilità e reazione in caso di errori nella predisposizione dell'etichetta, ma comporta un incremento dei costi legato alla manipolazione del prodotto, all'uso del magazzino franco (o in zona franca) ed alle prestazioni di servizi aggiuntivi da parte dell'importatore. Questa soluzione è preferibile per le spedizioni iniziali o per forniture con piccoli quantitativi.

Esempio di etichetta in cinese con definizione dei campi essenziali:
nome del prodotto

composizione

data di produzione

data di validità

modalità di conservazione

paese di origine

produttore

importatore (nome, indirizzo, telefono)

valori nutrizionali

peso netto

Codice a barre

Il codice a barre non è espressamente richiesto dalla norma ufficiale ma, soprattutto la GDO cinese, richiede che il prodotto sia già contraddistinto da un codice generato in Italia, per efficienza di gestione della merce e per rafforzare nel cliente la percezione di autenticità della provenienza estera del prodotto.

Fumigazione o trattamento termico dell'imballaggio in legno

Tutti i materiali da imballaggio in legno utilizzati per sostenere, proteggere o trasportare una spedizione (inclusi pallet e relativi piedini di appoggio) devono subire un trattamento termico (HT, a 56°/30' al cuore del legno) oppure di fumigazione con bromuro di metile (MB). Eseguito il trattamento sul materiale da imballaggio in legno, esso verrà contraddistinto con il marchio IPPC/FAO che riporta sigle e codici identificativi. Il marchio stampato sull'imballaggio in legno è condizione sufficiente perché lo stesso venga considerato a norma, senza il bisogno di alcuna dichiarazione aggiuntiva.

Procedura d'ingresso in dogana

Una volta in Cina, all'arrivo in dogana, le Autorità locali effettueranno i **controlli** e le altre **verifiche** previste dalle procedure di **ispezione** e **quarantena**. In base alla normativa saranno oggetto del controllo, allo stesso momento: etichette, prodotti, documenti di accompagnamento.

In particolare, China Inspection and Quarantine (CIQ, parte di AQSIQ) verificherà la corrispondenza dell'etichetta ai requisiti stabiliti dalle citate leggi e norme sugli standard cinesi, e ispezionerà l'autenticità (*Art. III Announcement on Adjusting the Label Approval System for Import and Export Foods and Cosmetics of General Administration of Quality Supervision, Inspection and Quarantine of The People's Republic of China No. 44, 2006*, valido dal 1° Aprile 2006). Se l'etichetta è ritenuta conforme alle norme e agli standard della legge cinese e il prodotto supera i controlli di qualità, China Inspection and Quarantine emetterà un certificato di ispezione attestante la conformità e contenente la dicitura "Label approved";

Se l'etichetta non è conforme alle norme locali o il prodotto non supera i controlli di qualità, "laddove leggi e regolamenti amministrativi non dispongano diversamente", China Inspection and Quarantine (CIQ) può ordinare alle parti di distruggere le merci importate; altrimenti è consentito all'esportatore di rispedirle all'origine: in quest'ultimo caso, l'esportatore può emettere una dichiarazione di reso (*return notice*) e notificarla alla dogana cinese in forma scritta. Con la dichiarazione di reso, la dogana potrà avviare le formalità per la spedizione delle merci al porto di partenza

La procedura di ispezione e controllo richiede di norma un tempo variabile **da 1 a 3 settimane** in base al tipo di prodotto e della complessità dei controlli di qualità.

Il ruolo dell'importatore

In qualsiasi mercato estero il ricorso alla figura **dell'importatore** è determinante. Tale scelta in Cina è **praticamente obbligatoria** in quanto tutte le operazioni di import-export devono essere effettuate tramite società dotate di licenza di commercio estero. Anche la maggior parte dei grandi clienti (horeca, gdo) non usa occuparsi dell'importazione diretta, rendendo il passaggio attraverso l'importatore l'unico canale di accesso percorribile.

In sintesi, la figura dell'importatore in Cina si occupa di:

- supportare la predisposizione della documentazione necessaria per l'esportazione, comprese le etichette;
- fornire direttamente, o con società collegate, la licenza di importazione;
- curare lo sdoganamento del prodotto ed il pagamento degli oneri connessi;
- provvedere direttamente, o con società collegate, alla distribuzione nel territorio interno;
- infine, nel caso in cui curi la distribuzione, assicura anche le attività di promozione, marketing e vendita del prodotto.

Cosa si può importare, cosa non si può importare

La tabella seguente riassume lo stato autorizzativo stabilito dal governo cinese per l'importazione dei prodotti alimentari italiani verso il mercato nazionale: è la fotografia, alla data di aggiornamento della presente nota, di quanto può e non può entrare nel mercato nazionale cinese. Poiché gli atti autorizzativi possono essere modificati anche repentinamente, è consigliabile chiedere sempre ad un qualsiasi ufficio ICE su territorio cinese (i cui contatti sono disponibili alla fine della nota) quale sia lo stato di autorizzazione per l'importazione del prodotto alimentare di interesse.

Nei ristoranti e nei supermercati delle città più grandi non è infrequente trovare anche prodotti che, secondo la tabella riassuntiva che segue, non sono ammessi all'importazione: si tratta di merce entrata attraverso la dogana di Hong Kong o grazie a relazioni di alcuni importatori presso gli uffici delle dogane di ingresso.

Prodotto	Status importazione	Nota
Agrumi	AMMESSA	da 11.05.2017
Caffè - cioccolato	AMMESSA	
Carne suina trattata termicamente	AMMESSA	ma necessaria verifica importabilità caso per caso
Carni a lunga stagionatura e carne suina trattata termicamente	AMMESSA	se stagionate più di 313 giorni
Carni fresche avicole	NON AMMESSA	a causa della influenza aviaria ("bird flu")
Carni fresche bovine	NON AMMESSA	a causa BSE, c.d. "mucca pazza"
Carni fresche ovine	NON AMMESSA	a causa del virus c.d. della "lingua blu"
Carni fresche suine	NON AMMESSA	a causa della malattia vascolare suina, c.d. "peste suina"
Carni poco stagionate	NON AMMESSA	se stagionate meno di 313 giorni
Farina di grano duro	NON AMMESSA	previsto protocollo di intesa per sblocco importazioni
Formaggi erborinati (per es. gorgonzola, taleggio)	AMMESSA	Parametri fissati nel 2010 in stato di revisione; China ci riapre la porta, export 15mila kg in 2016
Kiwi	AMMESSA	dal 06.07.2009
Latte e derivati tranne formaggi erborinati	AMMESSA	
Mortadella	AMMESSA	dal 06.12.2004
Ortofrutticoli freschi, tranne agrumi e kiwi	NON AMMESSA	a causa endemicità mosca mediterranea
Pancetta	NON AMMESSA	Accordo in fase di discussione
Prodotti da forno	AMMESSA	
Prosciutto cotto	AMMESSA	dal 06.12.2004
Prosciutto crudo	AMMESSA	dal 06.12.2004
Riso per risotti	NON AMMESSA	Protocollo in via di definizione
Salumi/insaccati, esclusi quanti già presenti in lista	NON AMMESSA	
Spezie	AMMESSA	

Spedizione campionatura promozionale

Per quanto riguarda la spedizione di **campionatura di prodotto a scopo promozionale**, si possono considerare tre principali casistiche:

1. Partecipazione a fiere

L'importazione di campionatura per l'esposizione durante una fiera segue una procedura speciale con la **sostanziale esenzione dall'obbligo di osservazione delle norme sull'etichettatura e di pagamento dei dazi** (in caso di utilizzo di Carnet ATA). Gli organizzatori fieristici, infatti, di solito stipulano degli **accordi con la China Inspection and Quarantine** competente per territorio per facilitare l'ingresso dei prodotti in fiera. Gli stessi organizzatori fieristici, di solito, forniscono tutte le informazioni dettagliate e la modulistica necessaria agli espositori per l'espletamento delle procedure di importazione: si consiglia comunque di verificare preventivamente ogni dettaglio e, in ogni caso, **affidarsi allo spedizioniere ufficiale** designato dagli organizzatori della manifestazione.

2. Altri eventi promozionali non fieristici

In questo caso si deve seguire la stessa procedura d'importazione dei prodotti destinati alla vendita: non esiste, infatti, una procedura speciale per l'invio di campioni non destinati alla vendita.

3. Campioni nel bagaglio

Qualora si voglia portare nel bagaglio campioni di bottiglie, ne sono consentite al massimo due, senza dover effettuare la procedura di importazione e la preparazione dell'etichette/a in cinese.

Dazi doganali

Pur essendo sensibilmente diminuiti nel corso degli anni, soprattutto a seguito dell'adesione della Cina al WTO, i dazi doganali, combinati all'IVA, continuano ad incidere sensibilmente sul prezzo finale dei prodotti.

I dazi attualmente in vigore per i principali prodotti agroalimentari sono i seguenti (fonte dogane cinesi 2018):

Prodotto	Codice Doganale	Dazio (%)	Imposta sul consumo (%)	VAT (%) VAT(%)	Totale (%)
Aceto	2209	15 (temporaneo)	-	17	34.6
Acqua minerale	2201.10	10	-	17	28.7
Altri olii	1509.90	10	-	17	28.7
Biscotti	1905.31-32	15	-	17	34.6
Caffè tostato	0901.21	15	-	17	34.6
Cioccolata	1806.10/20	10	-	17	28.7
Formaggi	0406	8	-	17	26.4
Latte	0401	15	-	17	34.6
Olio extravergine di oliva	1509.10	10	-	13	24.3
Pasta	1902	8	-	17	26.4
Prodotto da forno	1905.10/20/40/90	20	-	17	40.4
Prosciutto	0210.1900	20	-	13	35.6
Vino imbottigliato	2204.10-21	14	10	17	48.2
Vino sfuso	2204.29	20	10	17	75.5

Norma per l'etichettatura, traduzione non ufficiale dall'originale in cinese

China National Standard GB7718-2011, General rules for the labeling of prepackaged food, specifies the labeling requirements on layout and content of prepackaged foods in China. The final version was issued by the Ministry of Health (MOH) on 20 April 2011 and was implemented on 20 April 2012. The General Administration of Quality Supervision, Inspection and Quarantine (AQSIQ) is acting as the management body for this national standard.

General standard for the labeling of prepackaged foods

National food safety standard

General Rules for the labeling of prepackaged foods

GB7718-2011

Issued on April 20, 2011

Implemented on April 20, 2012

Issued by the Ministry of Health

Preface

This standard replaces the GB 7718-2004 General Rules for the labeling of prepackaged foods. Compared with GB 7718-2004, main changes of this standard are as followings

- Modification has been made to the scope of application;
- Modification has been made to the definitions of prepackaged food and date of manufacture, added the definition of configuration and cancelled the definition of storage period
- Modification has been made to the labeling method for food additives;
- Add to labeling method for configuration;
- Modification has been made to the labeling method for name, address and contact information of the manufacturer and distributor
- Modification has been made to the largest surfaces area of a package (container) of prepackaged food when the minimum size of the words, symbols and numerals in the mandatory labeling information shall not be less than 1.8 mm in height;
- Add to the recommended labeling requirement for the food which may contains allergies
- Modification has been made to the method of calculation for the largest surface area in appendix A
- Add to appendix B and appendix C

National food safety standard

General Rules for the labeling of prepackaged foods

1. Scope

This standard is applied to the labeling of prepackaged foods to be offered directly or indirectly as such to consumers.

This standard is not applied to the labeling of food package for transportation providing protection for prepackaged foods during transportation, labeling of foods in bulk and made as well as sold on the spot.

2 Terms and definitions

2.1 Prepackaged Food

Foods prepackaged in advance or made up with a measured quantity in a container includes foods prepackaged or made up in advance with a measured quantity in a container and have unified labeling of quality and volume within certain range.

2.2 Food Label

Food label means any words, pictorial, mark or other descriptive matter on the package or the container of food.

2.3 Ingredients

Any substance used in the manufacture or preparation of a food and present in the final product (including in a modified form), including food additive.

2.4 Date of Manufacture

The date on which the food becomes the final product includes packaging and filling date and it is also the final selling unit date after putting the foods into package (filling into containers).

2.5 Date of Minimum

Date of minimum durability (best before) means the date which signifies the end of the period under any stated storage conditions on the label of the prepackaged food during which the quality of the product will be maintained and the product will remain fully marketable and retain any specific qualities for which tacit or express claims have been made.

2.6 Configuration

Configuration means the descriptions of the relationship between total net weight and the units when prepackaged food contains more than one prepackaged foods.

2.7 Principal Display Panel

The panel easier to be found on package or containers of prepackaged foods

3. Basic requirements

3.1 Shall be in accordance with the requirements of laws and regulations, and the related food safety standard.

3.2 Shall be clear, prominent, indelible and readily legible by customers in purchase.

3.3 Shall be easily understood by the public, precise and supported by scientific evidence. Any indications, which are superstitious, pornographic, debasing other products, or unscientific, shall be prohibited.

3.4 Shall be true and accurate, and shall not be described or presented in a manner that is false, misleading or deceptive; or is likely to create an erroneous impression by means of different word size or color contrast.

3.5 Shall not be described or presented by words, pictorial or other devices which refer to or are suggestive either directly or indirectly, of any other product with which such food or its certain property might be confused.

3.6 Shall not declare or imply contents with effect of prevention and curing of diseases, and non-health care foods shall not be declared with the effect of health care directly or indirectly.

3.7 Shall not be separated from the foods or its package or container.

3.8 Shall be in normal Chinese characters (except registered trademark). Art characters of different kinds used for decorating must be written correctly and readily legible.

3.8.1 The Chinese pinyin or languages of minority ethnic groups may also be used at the same time, but the

size of words shall not be larger than the corresponding Chinese characters.

3.8.2 In addition to Chinese characters, foreign languages may also be used corresponding to the Chinese characters (except the name and address of the manufacturer of the imported food; the name and address of the overseas distributor; and website address). The foreign letters shall not be larger than the corresponding Chinese characters (except for registered trademarks).

3.9 Where the largest surfaces area of a package (container) of prepackaged food is more than 35 cm², the minimum size of the words, symbols and numerals in the mandatory labeling information shall not be less than 1.8 mm in height.(the method of calculation for the largest surfaces area is referred to appendix A)

3.10 The package in a selling unit including different kinds of and several independent package can be sold

independently, the foods labeling of each independent package shall be declared separately.

3.11 Where the outer wrapper is readily opened for labeling information distinguished or through an outer wrapper, the whole or part of the mandatory labeling information can be clearly distinguished in the

inner package (or container), the same labeling information may not be repeated on the outer wrapper; Otherwise, the mandatory labeling information shall be labeled on the outer wrapper.

4. Labeling information

4.1 Labeling information of prepackaged food for direct delivery to consumers

4.1.1 General requirements

Labeling of prepackaged food for direct delivery to consumers shall include name of foods, list of ingredients, net weight and configuration, name of the food, address and contact information of manufacturers and/or distributors, date of manufacture and date of minimum durability, conditions for the storage, food production license number, code of the product standard and other contents needed to be labeled.

4.1.2 The name of the food

4.1.2.1 The specific name of the food shall be presented in the prominent place of the label, and shall clearly indicate the true nature of the food.

4.1.2.1.1 Where a name or several names have been established in respect of a certain food under a national, trade, or local standard, one of these names or an equivalent name shall be selected for use.

4.1.2.1.2 In the absence of any such name, either a common or usual name which is not misleading or confusing to the consumer shall be used.

4.1.2.2 A -coined, —fanciful, -transliterated, -brand name, -folk name or -trade mark is used, provided it in the same display panel one of the names provided in Section 4.1.2.1.

4.1.2.2.1 When a -coined, -fanciful, -transliterated, -brand name, -folk name or -trade mark contains misleading words or terminologies, a specific name which indicates the true nature of the food in the same word size, shall be used in close proximity to this name in the same display panel.

4.1.2.2.2 When a specific name, which indicates the true nature of the food, is misleading as to the nature of the food due to the different size of the words, the same word size shall also be used to indicate the specific name.

4.1.2.3 There shall appear on the label either before or after the name of the food, such additional words or phrases as necessary to avoid misleading or confusing the consumer in regard to the true nature, physical condition of the food, or method of preparation of the food; for example dried, concentrated, reconstituted, smoked, fried, powdery, granular.

4.1.3 List of ingredients

4.1.3.1 The labeling of the prepackaged foods shall declare the list of ingredients. A specific name shall be used for ingredients in the list of ingredients in accordance with Section 4.1.2 and name shall be used for food additives in accordance with Section 4.1.3.1.4.

4.1.3.1.1 -Ingredients or -list of ingredients is the marker words of the list of ingredients. If the raw materials used in the preparation process are converted into other ingredients (refers to the fermented products such as wine, soy sauce, vinegar), the -raw materials or -raw materials and supplementary materials may be used to substitute -ingredients and -ingredients list, and various raw materials, supplementary materials and food additives shall be indicated according to the related provisions in this standard. The processing aids need not be indicated.

4.1.3.1.2 All ingredients shall be listed in descending order of their weights added in the process of manufacture or preparation of the food; those ingredients constituting less than 2% of the food may not be listed in descending order.

4.1.3.1.3 Where an ingredient is itself the product of two or more ingredients (except compound food additives), such a compound ingredient may be declared, as such, in the list of ingredients, provided that it is immediately accompanied by a list, in brackets, of its primary ingredients in descending order of proportion. Where a compound ingredient (for which a name has been established in a national, trade or provincial standard) constitutes less than 25% of the food, its primary ingredients need not be declared.

4.1.3.1.4 The names of food additives shall be declared in general names in accordance with GB 2760. General names of food additives can be declared as the specific name of the food additives and also can be declared as their class names and declare the specific name and international code (INS Number) of the food additives at the same time (for the methods of declaration refer to appendix B). On the label of the same prepackaged foods, one form shall be chosen to declare food additives. When the form of declaring

the class name and international code of food additives at the same time is adopted, and if some of the food additives does not have relevant international code or for the requirement of allergies, specific name of food additives can be declared. Names of food additives do not include their ways of making. Food additives in a compound ingredient constitute less than 25% of the food and if they are in accordance with bring-in principles stipulated in GB2760 and do not serve a technological function in the finished product, need not be declared.

4.1.3.1.5 Water added during preparation or processing of the food shall be declared in the table of ingredients. Water or other volatile ingredients evaporated in the course of manufacture need not be declared.

4.1.3.1.6 The edible package shall also be declared in the table of ingredients, except where stipulations of state laws and regulations provided otherwise.

4.1.3.2 The following food ingredient can be declared in accordance with Table 1.

TABLE 1

Ingredient classes	Labeling
Vegetable oils or refined vegetable oils, other than olive oil	"oil" together with either the term "vegetable", or "refined", qualified by the term "hydrogenated" or "partially-hydrogenated", as appropriate
Starches, other than chemically modified starches	"starch"
All spices and spice extracts not exceeding 2% by weight either singly or in combination in the food	"spice", "spices" or "mixed spices", as appropriate
All types of gum preparations used in the manufacture of gum base for chewing gum	"Chewing Gum Bases", "gum base"
All preserved fruits not exceeding 10% of the weight of the food	"Preserved fruit", "preserved fruit"
Food flavor, aroma	"Food flavor", "food aroma" "food flavor and food aroma"

4.1.4 Quantitative labeling of the ingredients

4.1.4.1 Where the labeling of a food places special emphasis on the presence of or adding one or more valuable and/or characterizing ingredients or components, the percentage of the emphasized ingredients added at the time of manufacture or the content of the emphasized components shall be declared.

4.1.4.2 Where the labeling of a food places special emphasis on the low content of one or more ingredients or components, the percentage of the emphasized ingredient or component in the final product shall be declared.

4.1.4.3 A reference in the name of a food to a particular ingredient or component shall not of itself constitute the placing of special emphasis.

4.1.5 Net Weight and Configuration

4.1.5.1 The net weight declaration shall be expressed using net weight, numerals and the official unit of measurement. (Refer to appendix C for declared form)

4.1.5.2 The net weight of the packaged food shall be declared in accordance with the official unit of measurement, in the following manner:

a) For liquid foods, by volume (L)(l) , ml (ml)(ml) , or use quantity (g), kg (kg) ;

b) For solid foods, by weight (g), kg ;

c) For semi-solid or viscous foods, or use quantity (g), kg (kg) or volume (L)(l) , ml (ml)(ml) .

4.1.5.3 The unit of measurement for net weight shall be declared in accordance with Table 2.

TABLE 2

Measurement method	Range of net weight Q	Unit of measurement
Volume	Q < 1000 ml	ml (ml)
	Q ≥ 1000 ml	L (l)
Weight	Q < 1000 g	g
	Q ≥ 1000 g	kg

4.1.5.4 The minimum font size of net weight declaration shall be in accordance with Table 3.

TABLE 3

Range of net weight Q	Minimum height of font / mm
$Q \leq 50 \text{ ml} ; Q \leq 50\text{g}$	2
$50 \text{ ml} < Q \leq 200 \text{ ml} ; 50 \text{ g} < Q \leq 200\text{g}$	3
$200 \text{ ml} < Q \leq 1\text{L} ; 200 \text{ g} < Q \leq 1 \text{ kg}$	4
$Q > 1 \text{ kg} ; Q > 1 \text{ L}$	6

4.1.5.5 The net weight and the name of the food shall be presented in the same display panel of the package (container).

4.1.5.6 In the case of a solid food packed in a liquid medium, the solid food is the main ingredient, in addition to the declaration of net contents, the drained (solid) contents shall also be declared, in weight or percentage. (Refer to appendix C for declared form)

4.1.5.7 For prepackaged food containing small units of prepackaged food, in addition to the declaration of net weight, the configuration shall also be declared on the outer package, except for those the inner pack does not be sold as individual units, for example, bits of candies, packets of cookies, pouches of succade and so on.

4.1.5.8 The declaration of configuration consists of net weight of the prepackaged food and the number of inner individual food units, or only the number of inner individual food units, the word configuration may not be declared. For prepackaged food with no inner packs, the configuration means net weight. (Refer to appendix C for declared form)

4.1.6 Name, address and contact information of the manufacturer and distributor

4.1.6.1 Name, address and contact information of manufacturer shall be declared. The name and address of manufacturer shall be registered according to laws and shall bear the responsibilities for safety and quality of products. In one of the following circumstances, the labeling shall be made according to the following requirement.

4.1.6.1.1 Any group company or its branch office (subsidiary) which by law bears independent statutory responsibilities shall have their respective name and address declared separately.

4.1.6.1.2 Any branch office or production facility of a group company which by law does not bear independent statutory responsibilities shall have the names and addresses of the group company and its branch office (production facility) declared; or only have the name, address and production facility of the group company declared. The production facility shall be declared to municipal region according to administrative divisions.

4.1.6.1.3 In the case of contract packer authorized to produce the prepackaged food, the name and address of the company that authorizes the contract packer and commissioned company shall be declared; or only have the name, address and production facility of the company that authorizes the contract packer declared. The production facility shall be declared to municipal region according to administrative divisions.

4.1.6.2 The contact information of manufacturer or distributor which by law bears independent statutory responsibilities shall be declared including at least one item in the following: telephone number, fax number, contact information on web and so on, or post address declared accompanied with address.

4.1.6.3 For imported prepackaged food, the country or region (Hong Kong, Macao or Taiwan) of origin, and the name, address and contact information of the agent, importer or distributor registered in the People's Republic of China, shall be declared. The declaration of name, address and contact information of the manufacturer may not be declared.

4.1.7 Date marking

4.1.7.1 The date of manufacture and the date of minimum durability shall be clearly declared. Where the date is indicated by making reference to a specific place of the package, this specific place of the package shall be indicated. There shall be no pasted - over, supplement, or amendment to the declared date. (Refer to appendix C for declared form)

4.1.7.2 For individually wrapped and prepackaged food units with date of minimum durability and

freshness date declared contained in the same large prepackage, the date of minimum durability declared on the large prepackage shall be calculated by the earliest date of minimum durability of the individually wrapped and prepackaged food unit; the date of manufacture declared on the large prepackage shall be calculated by the earliest date of manufacture of the individually wrapped and prepackaged food unit or the date of the large prepackage made into selling unit; or the date of manufacture and the date of minimum durability of the individually wrapped and prepackaged food units shall be declared separately on the large prepackage.

4.1.7.3 The date coding shall be marked in the sequence of the year, month and day, otherwise the order of the date coding shall be declared. (Refer to appendix C for declared form)

4.1.8 Conditions for the storage

Any special conditions for the storage of the food shall be declared on the label. (Refer to appendix C for declared form)

4.1.9 Food production license number

For the prepackaged food which needs to claim the food production license number, the declared form shall be in accordance with the relevant regulations.

4.1.10 Code of the product standard

4.1.10 The code and the order number of the product standard of the prepackaged food which is domestically produced and distributed (exclude imported prepackaged food) shall be declared.

4.1.11 Other labeling information

4.1.11.1 Irradiated foods

4.1.11.1.1 The label of a food which has been treated with ionizing radiation shall be marked "Irradiated food" in close proximity to the name of the food.

4.1.11.1.2 Any ingredient which has been treated with ionizing radiation shall be declared in the table of ingredients.

4.1.11.2 Genetically modified foods

The labeling of the genetically modified foods shall be made in accordance with the regulations of the related laws and rules.

4.1.11.3 Nutrition label

4.1.11.3.1 Special diet food and principal and supplementary foods for infant and babies shall declare their nutrient components and weight, and declared form is performed according to GB 13432.

4.1.11.3.2 If the other prepackaged foods need to declare nutrient components, the declared form shall be performed according to related regulation standards.

4.1.11.4 Quality grade

If relevant standard of product performed by foods clearly specifies quality grade, the quality grade shall be declared.

4.2 Labeling information of prepackaged food distributed to the consumers indirectly

The name, configuration, net weight, date of manufacture, date of minimum durability and conditions for the storage of prepackaged food distributed to the consumers indirectly shall be declared on the label in accordance with the requirements as Section 4.1, and other information not declared on the label shall be declared in the specification or contract.

4.3 Exemptions from labeling information
4.3.1 The following prepackaged foods can be exempted from declaring the date of minimum durability: alcoholic beverages in which the alcohol content is 10% or over, vinegar, salt, sugar in solid form and monosodium glutamate

4.3.2 For prepackaged food, if the package or container of prepackaged food whose largest surface area is less than 10 cm² (The method of calculation for the largest surface area is referred to appendix A), the name of the product, net weight and the name and address of the manufacturer or distributor may only be declared.

4.4 Recommended labeling information

4.4.1 Batch identification

The batch number of the product identification may be declared according to the requirements of products.

4.4.2 Instructions for use

Instructions for use, like opening method, consumption method, preparation method, method of reconstitution and other instructions which are helpful for consumers may be declared according to the requirements of products.

4.4.3 Allergies

4.4.3.1 The following food and product may bring response of allergy, and readily legible name should be declared in the ingredient list or prompt accompanied with the ingredient list.

- a) Grain and its product containing gluten protein (for example wheat, rye, barley, spelt or their crossbreeding products);
- b)Crustacean animal and its products (for example shrimp, lobster, crab and so on);
- b)Fish and its products d)Egg and its products
- e)Peanut and its products
- f)Soybean and its products
- g)Milk and dairy products (including lactose);
- h)Nut and its products.

4.4.3.2 If the above food or its product may be introduced during processing, it shall be declared near the ingredient list.

5 Others

The labels of foods needed special examination and approval according to related state regulations shall be performed according to related regulations.

Appendix A

Method of calculation for the largest surface area of package (container) A.1 Method of calculation for rectangular package (container)

In the case of a rectangular package (container), the product of the height (cm) of the side with the largest area times the width (cm) of that side.

A.2 Method of calculation for cylindrical or nearly cylindrical package (container)

In the case of a cylindrical or nearly cylindrical package (container), 40 percent of the product of the height (cm) of the container times the circumference (cm). A.3 In the case of any otherwise shaped package (container), 40 percent of the total surface of the package (container).

If the package (container) presents an obvious "principal display panel", the area of this "principal display panel" shall be used as the largest surface area.

For package bag and so on, when determining the surface area, the area of seal shall be excluded. In the case of bottle- shaped or can-shaped, when determining the surface area, the shoulders, necks, and the flanges at the tops and bottoms are excluded.

Appendix B

Declared form of food additives in the list of ingredients

B.1 Declare the specific names of all food additives in descending order of proportion
